

Duties of a Firefighter

Nature and scope of work

This is a skilled position that entails firefighting, rescue, emergency medical care, and other related emergency services. Firefighters participate in programs designed for the prevention of fires and the saving of life and property. A Firefighter is responsible for rapidly, efficiently and safely performing various duties under emergency conditions frequently involving considerable hazard. The work includes routine duties in the maintenance of firefighting vehicles, equipment and fire service facilities. While specific orders and directions are received from an Officer in the normal course of maintenance duties and firefighting, considerable independence of judgment and action is allowed in circumstances of extreme urgency where referral to a superior for instructions is not possible. A periodic review of the work is carried out by an officer in order to maintain and improve the efficiency of the fire service as a whole.

Illustrative examples of work

As a member of a shift or platoon, you will:

- respond to emergency calls, lay and connect hose, hold nozzles and direct water stream, raise and climb ladders, use extinguishers and other equipment.
